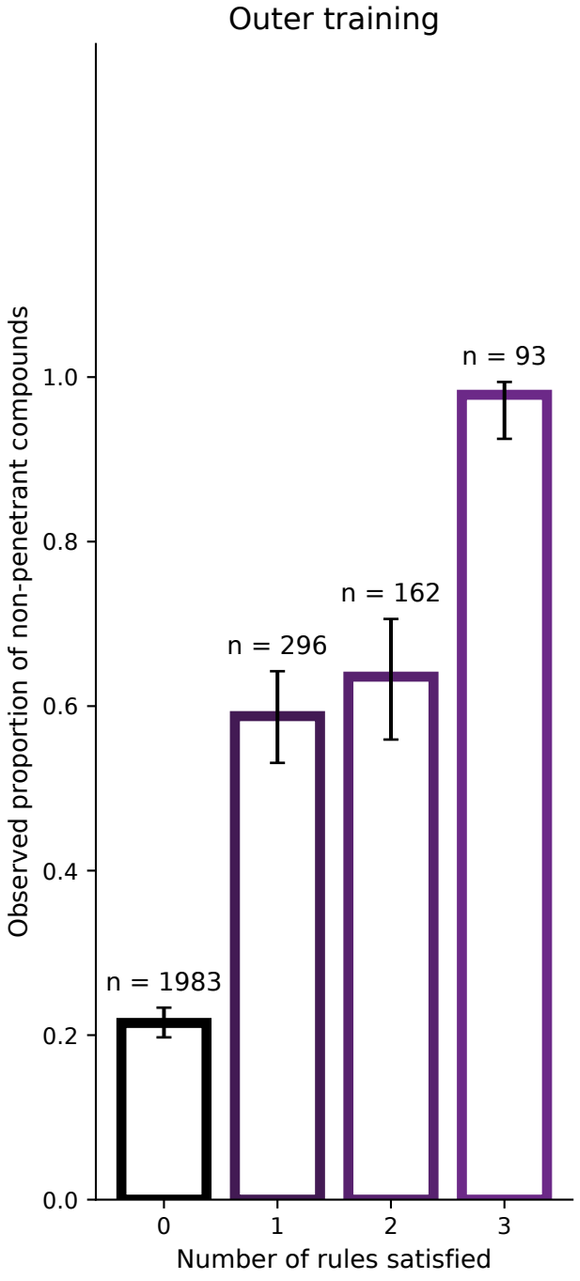
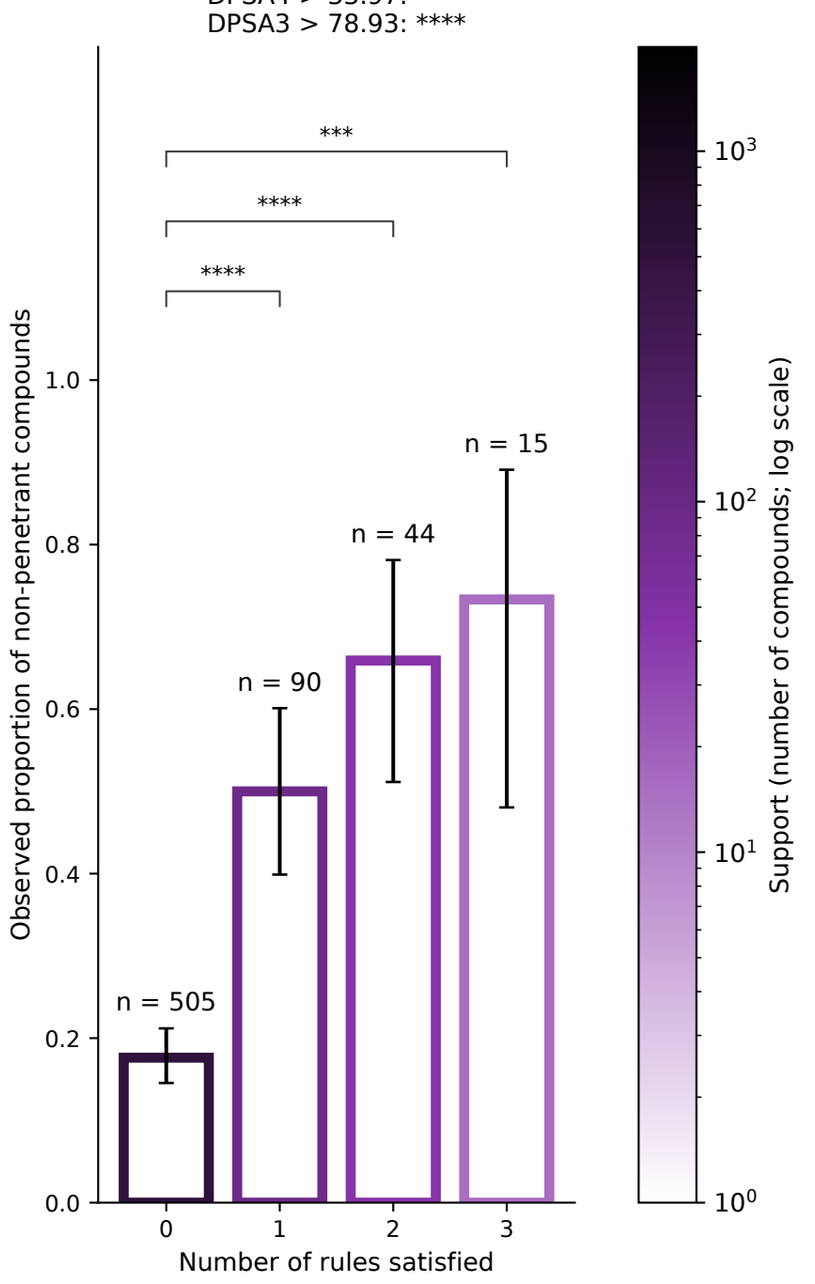
Mutual information at each selection step
Step 1: nAcid > 0
Training rows at this step: n = 2,534
Mutual information (nats)
nAcid
Step 2: DPSA4 > 33.97
Training rows at this step: n = 304
DPSA4
Step 3: DPSA3 > 78.93
Training rows at this step: n = 128
DPSA3



Outer training
Observed proportion of non-penetrant compounds
n = 1983
n = 296
n = 162
n = 93
Number of rules satisfied



Held-out outer test
Standalone rule vs rest — Holm-adjusted significance
nAcid > 0: ****
DPSA4 > 33.97: ****
DPSA3 > 78.93: ****
Observed proportion of non-penetrant compounds
n = 505
n = 90
n = 44
n = 15
Number of rules satisfied
Support (number of compounds; log scale)
