Mutual information at each selection step
Step 1: ATSC4c <= -0.4377
Training rows at this step: n = 2,562
Mutual information (nats)
ATSC4c
Step 2: FNSA2 <= -1.283
Training rows at this step: n = 164
FNSA2
Step 3: nHetero > 9
Training rows at this step: n = 59
nHetero
Outer training
Observed proportion of non-penetrant compounds
n = 2235
n = 201
n = 89
n = 37
Number of rules satisfied
Held-out outer test
Standalone rule vs rest — Holm-adjusted significance
ATSC4c <= -0.4377: ****
FNSA2 <= -1.283: ****
nHetero > 9: ****
n = 526
n = 59
n = 28
n = 13
Support (number of compounds; log scale)
